<b>Q 2.</b>	<b>Entrepreneurship technical training: We would like to know, if you need an already developed training manual for the technical training or just program of study with training curriculum</b>																																																												
A 2.	<p>We have not developed a manual for the entrepreneur technical training - we would need this to be developed - it would be good to have this as a stand alone module - and not integrated into the study programme. It would then be good if in the study programme there is an element of using what they have learned in the technical training in their further studies.</p>
